FMKT 256 · AI EXTRA CREDIT · OPTION 2

U.S. & Canadian Railroads: One-Pagers and Long/Short Call

8 companies · AI-written one-pagers on live market data · Report generated November 03, 2026 03:53 AM

Andrew Jaynes · Ryan Readlinger · Finn Kelly

BEST LONG

Long/short decision pending. See prompts_to_paste/LONG_SHORT.md

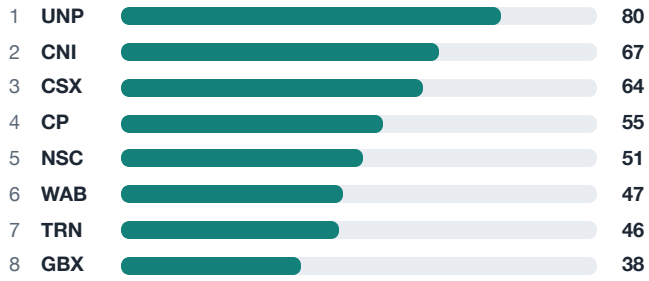

BEST SHORT

Long/short decision pending. See prompts_to_paste/LONG_SHORT.md

Built to be re-run, not re-coded. Every number in this report is pulled live and every page is generated automatically. To analyze **different companies**, a **different sector**, or simply **refresh the data**, edit one plain-text list of tickers and run one command:

`python run.py sectors/railroads.yaml` See page 2 for the full how-to.

QUANTITATIVE SCREEN: COMPOSITE SCORE (0–100)

Score = weighted percentile rank on valuation, profitability, balance sheet, momentum and street view. The AI makes the final call (p. 12).

UNIVERSE

- **UNP** Union Pacific Corporation
- **CNI** Canadian National Railway Company
- **CSX** CSX Corporation
- **CP** Canadian Pacific Kansas City Limited
- **NSC** Norfolk Southern Corporation
- **WAB** Westinghouse Air Brake Technologies Corporation
- **TRN** Trinity Industries
- **GBX** The Greenbrier Companies

WHAT'S INSIDE

p. 2	**How to reuse this tool with new companies or new data, without new code**
p. 3	**Sector dashboard: side-by-side comparison, scores, valuation map**
p. 4–11	**One-page summary per company (ordered by composite score)**
p. 12	**Long / short decision memo**
p. 13	**Methodology, data sources and AI prompts**

How to reuse this: new companies or new data, zero new code

The analysis is driven by a plain-text **sector file**. The code never changes. Only the list of tickers does.

1

Edit the ticker list

Open `sectors/railroads.yaml` in any text editor. Add, remove or replace tickers. For a new sector, copy the file (e.g. `sectors/railroads.yaml`) and change the name and tickers.

2

Run one command

`python run.py sectors/railroads.yaml`

Prices, financials, peer medians, ranks, charts and scores are all re-pulled and recomputed live for whatever tickers are listed.

3

AI writes the analysis

With a Claude API key, Claude searches the web and writes every one-pager plus the long/short memo automatically. Without one, the tool writes **copy-paste prompts** for Claude.ai or ChatGPT, still with no coding.

THE ENTIRE INPUT FOR THIS REPORT

```
sector: "U.S. Class I Railroads"
slug: railroads            # folder name used for cached data /
AI output
report_title: "U.S. & Canadian Railroads: One-Pagers and
Long/Short Call"
team: "Andrew Jaynes · Ryan Readlinger · Finn Kelly"
code_url: "https://github.com/andrewjaynes/fmkt256-airlines-
long-short"   # optional: public link to this code (GitHub /

interest

ai:  ...  (optional, plain English / settings)
```

WHAT HAPPENS WHEN YOU RUN IT

1 · Fetch
Live prices, statements, consensus for each ticker

→

2 · Score
21 metrics, peer medians, ranks, 0–100 composite

3 · AI
Claude researches news and writes each one-pager and picks long/short

→

4 · Render
Charts + pages, printed to this PDF

COMMON SCENARIOS

I want to…	Do this
Refresh with today's data	**Re-run the same command**
Add / drop a company	**Edit the `tickers:` list, re-run**
Cover a new sector	**Copy the sector file, change name + tickers**
Emphasize value over momentum	**Change the `weights:` numbers**
Force new AI write-ups	**`python run.py --refresh-ai`**
Change what the AI writes	**Edit the plain-English prompt in `prompts/`**

Ships with a second sector file, `sectors/railroads.yaml`, as a ready-made example. Saved AI write-ups are stored as JSON in `analysis/<sector>/` and reused until they are 30 days old.

PROOF: THE SAME CODE, RUN ON A DIFFERENT SECTOR FILE

U.S. Airlines `python run.py sectors/airlines.yaml` generated 2026-11-03 03:53 · 9 companies · zero code changes

1. UAL 78 | **2. SKYW** 76 | **3. ALGT** 67 | **4. DAL** 64 | **5. LUV** 64 | **6. ALK** 40 | **7. AAL** 36 | **8. ULCC** 31 | **9. JBLU** 21

Composite scores computed live from the sector file's ticker list.

COMPANY DESCRIPTION (YAHOO FINANCE)

CSX Corporation, together with its subsidiaries, provides rail-based freight transportation services in the United States and Canada. It operates through two segments: rail and trucking. The company offers rail services; and transportation of intermodal containers and trailers, as well as other transportation services, such as rail-to-truck transfers and bulk commodity operations. It also transports chemicals, agricultural and food products, minerals, automotive, forest products, fertilizers, and metals and equipment; and coal, coke, and iron ore to electricity-generating power plants, steel manufacturers, and industrial plants, as well as exports coal to deep-water port facilities. In addition, the company provides intermodal services through a network of approximately 30 terminals transporting manufactured consumer goods in containers; and drayage services, including the pickup and...

COMPANY DESCRIPTION (YAHOO FINANCE)

Canadian Pacific Kansas City Limited, together with its subsidiaries, owns and operates a transcontinental freight railway in Canada, the United States, and Mexico. The transports bulk commodities, including grain, coal, potash, fertilizers, and sulphur; merchandise freight consists of industrial and consumer products, such as forest products, energy, chemicals and plastics, metals, minerals, consumer products, and automotive; and intermodal traffic comprising retail goods in overseas containers. The company also provides rail and intermodal transportation services through a network of approximately 20,000 miles serving business centers. The company was formerly known as Canadian Pacific Railway Limited and changed its name to Canadian Pacific Kansas City Limited in April 2023. Canadian Pacific Kansas City Limited was founded in 1881 and is headquartered in Calgary, Canada.

COMPANY DESCRIPTION (YAHOO FINANCE)

Trinity Industries, Inc. provides railcar products and services under the TrinityRail trade name in North America. The company operates in two segments, Railcar Leasing and Services Group, and Rail Products Group. The Railcar Leasing and Services Group segment leases freight and tank railcars; originates and manages railcar leases for third-party investors; and provides fleet leasing, management, and administrative services, as well as railcar maintenance and modification services, and other railcar logistics products and services. As of December 31, 2025, it had a fleet of 101,485 railcars. This segment serves industrial shipper and railroad companies operating in refined products and chemicals, energy, agriculture, construction and metals, and consumer products. The Rail Products Group segment manufactures freight and tank railcars for transporting various liquids, gases, and dry...

Methodology, sources and AI prompts

QUANTITATIVE DATA

All market and financial figures are pulled live from Yahoo Finance (via the open-source `yfinance` library) each time the report is generated. No numbers are typed in by hand. TTM margins are the sum of the last four reported quarters. Revenue growth compares the latest quarter with the same quarter a year earlier. Net debt = total debt (incl. leases) – cash and investments.

COMPOSITE SCORE

Eleven metrics are converted to percentile ranks within the peer group (so the score is always *relative*), averaged into five pillars, then weighted per the sector file:

Pillar	Metrics (direction)	Weight
Valuation	EV/EBITDA ↓, forward P/E ↓	**25%**
Profitability	Operating margin ↑, net margin ↑, ROE ↑	**20%**
Balance sheet	Net debt/EBITDA ↓, cash/revenue ↑	**25%**
Momentum	1-yr return ↑, distance from 52-wk high ↑	**15%**
Street view	Upside to consensus target ↑, short interest ↓	**15%**

Negative EBITDA or earnings make a multiple "not meaningful"; those companies receive the lowest score on that metric.

DIVISION OF LABOR: CODE VS. AI

Code does what must be exact: fetching, calculating, ranking, charting. **AI** does what needs judgment: researching recent earnings and news, writing the qualitative assessment, and making the final long/short call (it may override the screen if it explains why).

AI WRITE-UPS IN THIS EDITION

Generated by: pending. Each write-up cites its sources, listed below and in each page footer.

SOURCES CITED BY THE AI

PROMPTS (PLAIN ENGLISH, EDITABLE IN PROMPTS/)

one_pager.md: "Write the qualitative half of a one-page summary… use [the live data], do not contradict it, and do not invent any other numbers… search the web for this company's most recent quarterly earnings release… Return ONLY a JSON object…"

long_short.md: "Pick the single best LONG and the single best SHORT… Start from the quantitative screen, but you may override it if the qualitative evidence justifies that… For the short, address crowding, squeeze risk, and borrow…"

LIMITATIONS

- Yahoo Finance can lag new filings by days. Each page footer shows the latest quarter in the data.
- Airline-specific KPIs (CASM-ex, RASM, load factor) are not in free data feeds, so they appear only where the AI cites a filing.
- For educational use only, not investment advice.
